L172 Worksheet 3 — Handwritten reflection

Information, Entropy and Intelligence

Print this form, write **by hand**, then either scan or photograph clearly and upload as a **separate PDF**, or hand in a paper copy at the start of lecture 6. Do **not** type the reflection.

CRSid	**Date**
_____	_____

Prompt (up to about 300 words; use the lined pages):

- Which explanations of Maxwell's demon surfaced in the exchange, and how do they relate to a coarse-graining picture (compartments, ledgers, legal descriptions)?
- What did you learn about the model's way of locating — or refusing to locate — the missing entropy?
- Where did thinking in terms of coarse graining help you compare those explanations, and where did another framing do more work?
- Has your sense of LLMs as tools of inquiry changed since Worksheet 2?

Upload as `L172_<CRSid>_worksheet3_reflection.pdf` (or hand in a paper copy). Dialogue file is separate: `L172_<CRSid>_worksheet3_dialogue.md`.
