L172 Worksheet 1 — Handwritten reflection

Information, Entropy and Intelligence

Print this form, write **by hand**, then scan or photograph clearly and upload as a **separate PDF**. Do **not** type the reflection. Do **not** write your name or CRSid.

Candidate number	**Date**
_____	_____

Prompt (about 300 words; use the lined pages):

- What did the dialogue teach you about why Shannon called information *entropy*, and about the Tolman / Wiener / Gibbs trail versus the von Neumann anecdote?
- Where was the model strong? Where was it thin, circular, or inconsistent?
- Did it treat entropy as a *no-go* (what you cannot do) or as a *recipe* (what you should do) — and which half did it miss?

Upload as `candidatenumber_worksheet1_reflection.pdf`. Dialogue file is separate: `candidatenumber_worksheet1_dialogue.md`.
